

Z Car Club NSW - Technical Day

17th June 2023

A number of ZCC members have requested that the club hold some technical days to help Z owners look after their pride and joy. This event is designed to assist novices and keen enthusiasts to learn some basics.

Address: 72 Kent St, Epping NSW

Start Time: 9:30am through until we run out of ideas

Focus: Early Z's with carburettors

Technical content:

General maintenance for daily drives with the Z

Motorsport and Track Day preparations for reliable Z performance (Checklists to be supplied)

Hospitality:

John Wakeling and family have kindly offered to host the event, offering morning tea with scones.

Depending on interested member numbers there may even be a BBQ fired up at lunch time to keep things going.

What to bring along:

Your positive vibes to enjoy a morning of discussions with other members and your Z if you want to have a technical chat about a particular issue. There should be plenty of parking spots available in the street.

What to expect:

Some experienced ZCC members will lead demonstrations and discussions around general car maintenance, engine tuning, suspension and car set ups to promote sporty reliable driving, or track day racing. The use of automotive tooling, mechanical adjustments and records to keep will be presented as a focus during the activities.

What not to do:

Please, no hooning in the street out front of John's residence during or after the event, as there will already be some revving of engines during tuning demonstrations.

RSVPs:

Graham Neasmith, Motorsport Secretary, 0438721807 with text message - by Wednesday 14th June 2023.
